Advanced Sterilization Products (ASP) Now Featured on Attainia Healthcare Equipment Planning Portal

Irvine, CA – February 11, 2013

Advanced Sterilization Products (ASP), a global leader in infection prevention solutions, is listing a comprehensive line of ASP capital equipment specifications and facility planning guidance for healthcare facilities on the Attainia web site. Attainia is the industry leader in healthcare equipment-planning solutions.

“We are excited to help customers meet their facility planning needs through a convenient and easy online solution with Attainia,” notes Matt Thompson, Americas Product Director. “Thousands of healthcare facilities worldwide rely on ASP solutions, and now our customers can easily access ASP capital equipment specifications and facility planning guidance in one convenient location.”

This relationship will make it easier for ASP products to be specified early in the facility-planning process. Technical documentation, system configurations, pricing and contract information about ASP solutions will now be easily accessible to key decision-makers in the facility planning process. The Attainia online equipment planning, budgeting and tracking system is used by medical equipment planners, major hospital purchasing groups, integrated delivery networks and individual healthcare facilities across the globe.

About ASP
ASP (Advanced Sterilization Products), a Johnson & Johnson company, is a global developer of innovative infection prevention solutions and educational programs. For over 25 years, the company has been dedicated to protecting patients, healthcare workers, and the environment with technology, products, and services that focus on raising the standard of care.
